

# Forum Acusticum 2020

Lyon, April 20-24, 2020

Dear Colleague,

Forum Acusticum is the triennial congress of the European Acoustics Association. Next edition will take place in Lyon (France), 20 to 24 April 2020.

This congress will present the latest developments in all areas of acoustics. Basic and applied research are concerned. About 130 structured sessions are being organized - and, in each topic, a general session will gather contributions which do not fit in one of them. Your work will certainly find its audience !

You can have a look at the scientific program on <https://fa2020.universite-lyon.fr>

The European Acoustics Association will offer travel grants to 10 students - and the Young Acoustician Network will propose some specific events to all early-career attendees.

Lyon is a beautiful (Unesco World Heritage since 1998) and vivid city. The congress center is located in the city center and the accommodation offer is quite large (not to mention the catering offer !).

We would be very happy to welcome you there. Abstract submission is already possible on the website (<https://fa2020.universite-lyon.fr>). Please note the deadline (december 1<sup>st</sup>, 2019) !

Looking forward to meeting you in Lyon !

Sincerely,  
Etienne Parizet
